ChromeCookiesView is a small application designed specifically for helping you identify all cookies stored by Chrome and delete them with minimal effort. The advantages of being portable Since this is a portable application, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to clean cookies saved by Chrome on the breeze, without having to go through installation steps. Simple looks You are welcomed by a clean feature lineup that allows you to tweak the dedicated parameters with minimal effort. As soon as run the application, it automatically builds up a list with all identified cookies and provides information about each one, such as host name, file path, name, and value. Deletion operations ChromeCookiesView gives you the possibility to view the total number of detected cookies, delete all cookies or only the selected ones, as well as check out detailed information about each cookie (e.g. creation date, last accessed date, value, name). What's more, you are allowed to choose the columns that are displayed in the main window (e.g. host name, path, last accessed date), refresh the current list with just one click, and generate HTML reports with all items or only the selected ones. Last but not least, the tool lets you perform search operations, copy the selected cookie to the clipboard, so you can easily paste it into other third-party utilities, as well as specify the directory that stores the cookies. Performance Tests have shown that ChromeCookiesView carries out a task quickly. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not affected. Bottom line To sum things up, ChromeCookiesView combines ease of use with several handy features in order to help you protect your online privacy from prying eyes. How to get rid of chrome super cookies? A: You might want to use RoboBrowser, a free program, that can delete the excessive cookies and its uses. It is made by Pavel, with a tutorial available at SuperCookies Forum. It was tested by a lot of people, and it apparently works. The downside is that it is in v 5.0.8, and might not be updated anymore. However, that's not a big problem, since it has many alternatives.

The verification process began two years ago, when the TRACON and MEA authorities informed the carrier that Abu Dhabi had complained of problems at an airport. The agency launched an in-depth investigation, and two years later, found that the UAE's main airport, the Ras Al-Khaimah Airport in the Emirates, was not in compliance with international safety regulations. The authority then issued its findings to the operator of the airport, Emirates. The TRACON crew also took over inspection of the airport's control tower to ensure safety for pilots and passengers, and made sure its CCTV cameras were working properly. The second phase of the investigation, carried out by the MEA in late October and early November 2017, added significant weight to the TRACON findings. "The findings by TRACON and MEA bring more weight and confidence to our findings, which had earlier brought UAE authorities to the airport's management. We used the same standards that we apply to all the airports in the Emirates," TRACON managing director Steven Manir said on his Twitter account on Sunday. He added that when Emirates made its complaints about the airport's operations, TRACON collected information from the airport's management, experts at the airport, the MEA and Emirates' representatives. Share this video Indonesia's ANFO-D production capacity fell by 6.2 percent last year, driven by a 30.7 percent plunge in output at oil refineries, which supplied 100,000 barrels a day less fuel oil in 2016 than in the previous year, the Indonesian Petroleum Institute said. In 2016, there was a big explosion at the Ampera refinery in Batavia. The large plant had the capacity to process 2 million barrels of oil a day, but last year, it processed just 1.
